FUNCTIONAL ANALYSIS AND ITS APPLICATIONS

Volume 26, Numbers 1–4, 1992

(A translation of *Funktsional'nyi Analiz i Ego Prilozheniya*)

Engl./Russ.

Volume 26, Number 1, January–March, 1992

Phase-Locking for Mathieu Type Vector Fields on a Torus – O. G. Galkin	1	1
Relations between Monodromy Groups of a Singularity – G. G. Il'yuta	7	9
Differential Equations on the Prym Theta Function. A Realness Criterion for Two-Dimensional, Finite-Zone, Potential Schrödinger Operators – S. M. Natanzon	13	17
De Rham Theory of a Simplicial Complex – I. V. Savel'ev	21	27
A Theorem on Four Vertices of a Convex Space Curve – V. D. Sedykh	28	35
Invariant Elements in a Modular Lattice Associated with an Extended Dynkin Diagram $\widetilde{E}_6$ – R. B. Stekol'shchik	33	42
Brief Communications		
Asymptotics of Spectral Projectors of Pseudodifferential Operators – K. Kh. Boimatov	42	54
Computation of $H^*(\mathrm{sl}(2), M)$ with Coefficients in a Simple $\mathrm{sl}(2)$-Module – V. V. Bavula	45	57
Oscillatory Integrals and Volumes with Semiquasihomogeneous Phase – V. N. Karpushkin	46	59
A Norm Estimation for the Generalized Quasitranslation Operator by Orthogonal Polynomials – B. P. Osilenker	48	61
Lagrangian Construction of the Enveloping Algebra $U(\mathrm{sl}_n)$ – V. A. Ginzburg	51	64
Three Problems on the Group of Symplectomorphisms – R. S. Ismagilov	53	66
Orbits and Invariants of the Supergroup GQ_n – V. N. Shander	55	69
Quasimodes Generated by the Characters of a Dynamical Group and Deformation of the Kirillov Form – Yu. M. Vorob'ev and M. V. Karasev	57	71
Explicit Formulas for Spherical Functions on Symmetric Spaces of Type AII – A. P. Veselov and O. A. Chalykh	59	74
Fermionic Dual Pairs of Representations of Loop Groups – G. L. Rybnikov	61	76
Structure of Quasitriangular Quasi-Hopf Algebras – V. G. Drinfel'd	63	78
On Eigenvector Expansion of Multiparameter Spectral Problems – Yu. M. Berezansky and A. Yu. Konstantinov	65	81
On Operators Almost Commuting with Respect to Order – S. Yu. Sadov	67	83
The Universal R-Matrix for Quantum Untwisted Affine Lie Algebras – V. N. Tolstoy and S. M. Khoroshkin	69	85
Supersymmetric Nonlinear Graviton – S. A. Merkulov	72	89
Infinite-Dimensional Schrödinger Equations and the Representation of a Group of Symplectomorphisms of a Hilbert Phase Space – A. Yu. Daletskii	74	91

Volume 26, Number 2, April–June, 1992

On Center-valued Traces on Real Operator Algebras – Sh. A. Ayupov	77	1
On the Space of Real Polynomials Without Multiple Critical Values – S. A. Barannikov	84	10
Estimation of the Cauchy Function for Finite-Zone Nonperiodic Potentials – B. M. Levitan and A. B. Khasanov	91	18

	Engl.	Russ.
On the Growth of the Number of Long Periodic Solutions of Differential Equations – E. Rosales	99	29
Universality of the Zero-Dimensional Selection Theorem – P. V. Semenov and E. V. Shchepin	105	36
On Algebraic Relations in Non-Archimedian Fields – V. G. Chirskii	108	41
Brief Communications		
On Modules of Eigenvalues for Non-Self-Adjoint Agmon–Douglis–Nirenberg Elliptic Boundary Problems with a Parameter – M. S. Agranovich	116	51
Compact Disjointness Preserving Operators – E. L. Arenson and A. K. Kitover	119	55
Composite Logarithm in the Class of Formal Operator Power Series – M. N. Araslanov and Yu. L. Daletskii	121	57
The Quasiclassical Limit for the Schrödinger Operator and Phase Transitions in Quantum Statistical Physics – V. S. Barbulyak and Yu. G. Kondrat′ev	124	61
Exponential sums and integrals over convex polytopes – A. I. Barvinok	127	64
On the Uniqueness of the Solution of the Inverse Normal Interpolation Problem – L. V. Veselova and O. E. Tikhonov	129	67
General Hypergeometric Functions – M. I. Graev	131	69
Homogeneous Domains Connected with Factors of Type II_∞ and Representations of Infinite-Dimensional Groups – R. S. Ismagilov	133	72
On $sl(n)$-modules of Finite-Dimensional Weight – B. V. Lidskii	136	74
On the Spectrum of Difference Schrödinger Operator with a Fractal Potential – L. A. Malozemov	138	77
On the Hamiltonian Formalism for Korteweg-de Vries Type Hierarchies – V. G. Mikhalev	140	79
On the Poincaré Series of Representations of Finite Reflection Groups – V. F. Molchanov	143	82
On the Point Spectrum of Discrete Schrödinger Operator – S. N. Naboko and S. I. Yakovlev	145	85
On the Decay of Step for the Korteweg-de Vries-Burgers Equation – P. I. Naumkin and I. A. Shishmarev	148	88
Representations of the Group of Invertible Infinite Matrices with Coefficients in a Finite-Dimensional Algebra – N. I. Nessonov	151	93

Volume 26, Number 3, July–September, 1992

Mixing for Some Classes of Special Flows Over Rotations of the Circle – Ya. G. Sinai and K. M. Khanin	155	1
Arithmetic Isomorphism of Hyperbolic Toral Automorphisms and Sofic Shifts – A. M. Vershik	170	22
On Stable Singular Lagrangian Varieties – V. M. Zakalyukin and R. M. Roberts	174	28
A q-Analog of the Hook Walk Algorithm and Random Young Tableaux – S. V. Kerov	179	35
Bicyclic WJ^*-Algebras in Pontryagin space of type Π_1 – S. N. Litvinov	188	46
The Selberg Trace Formula and Selberg Zeta-Function for Cocompact Discrete Subgroups of $\mathrm{SO}_+(1, n)$ – L. B. Parnovskii	196	55
Highest Weight Modules over Certain Quasigraded Lie Algebras on Elliptic Curves – O. K. Sheinman	203	65
Brief Communications		
On Function Spaces that are Interpolating at Any k Nodes – V. A. Vasil′ev	209	72
Parametric Resonance and Geodesics on an Ellipsoid – A. P. Veselov	211	74
Classification of Unimodal and Bimodal Corner Singularities – A. S. Kryukovskii and D. V. Rastyagaev	213	77

	Engl./	Russ.
A Bijective Proof of the Hook-Length Formula and its Analogs – I. M. Pak and A. V. Stoyanovskii	216	80
Invariant Semilinear Elliptic Equations on Manifolds of Constant Negative Curvature – A. A. Pankov	218	82
Widths of the Unit Ball of H^∞ in the Weighted Spaces $L_q(\mu)$ – O. G. Parfenov	220	85
Analogue of the Classical Invariant Theory for Lie Superalgebras – A. N. Sergeev	223	88
On the Quantum Flag Manifold – Ya. S. Soibelman	225	90
Topology of the Space of Nondegenerate Curves – M. Z. Shapiro	227	93

Volume 26, Number 4, October–December, 1992

A Theory of Noncommutative Determinants and Characteristic Functions of Graphs – I. M. Gel'fand and V. S. Retakh	231	1
Central Extensions of Infinite-Dimensional Lie Algebras – A. S. Dzhumadil'daev	247	21
Universal Completions of Complex Classical Groups – Yu. A. Neretin	254	30
Pseudodifferential Operators with Discontinuous Symbols: K-Theory and the Index Formula – B. A. Plamenevskii and G. V. Rozenblyum	266	45
Newton Polyhedron, Hilbert Polynomial, and Sums of Finite Sets – A. G. Khovanskii	276	57
Brief Communications		
On One Class of Bases in Hilbert Spaces and the Similarity Problem for Volterra Operators – G. M. Gubreev	282	64
Symbols of Some Operator Sequences and Quadrature Methods for Solving Singular Integral Equations with Conjugation – V. D. Didenko and B. Silbermann	285	67
Decomposition of Symmetric and Exterior Powers of the Coadjoint Representation of $\mathfrak{gl}(n)$ in the Unstable Case – I. F. Donin	287	70
Irreducible Graded $A_1^{(1)}$-Modules – V. M. Futorny	289	73
Vector Invariants of the Groups $\mathrm{GL}(n, \mathbb{C}[[t]])$ and $\mathrm{Sp}(2m, \mathbb{C}[[t]])$ – G. L. Rybnikov	291	75
Pseudocharacters on the Group $SL(2, Z)$ – V. A. Faiziev	293	77
Necessary Conditions for Similarity of an Operator to a Self-Adjoint One – M. M. Faddeev	295	80
Dirac Reduction of the Hamiltonian Operator $\delta^{IJ}d/dx$ to a Submanifold of Euclidean Space with Flat Normal Connection – E. V. Ferapontov	298	83
Bounds for the Betti Numbers of a Level Surface of a Harmonic Polynomial – V. N. Karpushkin	300	86
Isomorphism of the n-Dimensional Neumann System and the n-Site Gaudin Magnet – V. B. Kuznetsov	302	88
Deformations of the Nilpotent Infinite-Dimensional Lie Algebra L_2 – Yu. Yu. Kochetkov and G. F. Post	304	90
Limit Theorems for Basic States of the Anderson Model – A. Astrauskas and S. A. Molchanov	305	92
